

SnapCrate™

The Right Container for Today's World – **FLAT!**

Ship Flat • Store Flat • Stack Flat

- ▶ **SnapCrate™** was designed to provide cost savings and efficiencies critical for today's competitive global markets as well as support environmental and resource sustainability concerns.

A wide-range of items can be transported and stored in **SnapCrates**, and their innovative collapsible design maximizes efficiency and minimizes waste, transportation and storage costs associated with other single-use commercial wooden and plastic crates, totes and containers.

With increasingly competitive global markets, manufacturers, distributors and supply-chain professionals realize the urgency to cut costs and to incorporate practices to protect and sustain natural resources. As a result, many businesses will utilize **SnapCrate™** transport containers to handle their demanding packaging requirements.

SnapCrate™ Reusable & Collapsible Containers

Commercial, Government, Military and Rapid Response Applications

Reusable, Collapsible SnapCrate™

Improve handling efficiency, maximize storage and shipping space, and reduce waste and costs associated with single-use, expendable packaging. This translates to more profitability!

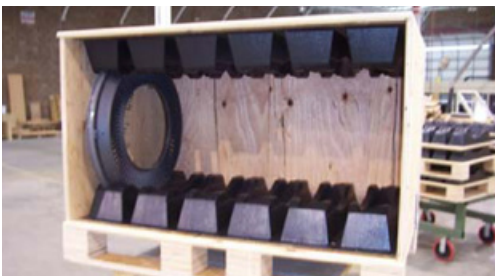

Numerous articles and recent case studies confirm that reusable transport containers can save manufacturers and suppliers significant money and resources.

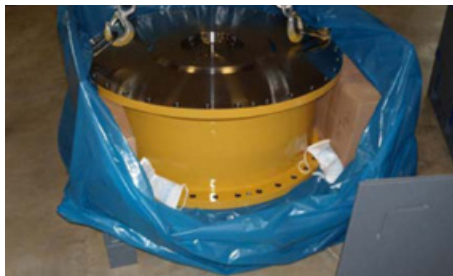

Single-Use SnapCrate™

INBOUND FREIGHT • INTERPLANT WORK-IN-PROCESS FINISHED GOODS • SERVICE PARTS
Easy • Fast • Custom Sizes • Economical • Store Flat

Unlike other one-way or single-use shipping containers, **SnapCrate™** single-use transport containers offer added efficiencies. Single-use **SnapCrates** feature OSB and stainless steel fasteners.
