FOR IMMEDIATE RELEASE

**Versi-Panel Enclosures to Showcase Portable Shelters at First Comprehensive International Disaster Industry Conference & Expo**

January 2, 2012, Colorado Springs, CO — Versi-Panel Enclosures announced that they will display their BunkHouse and AnimalSafe Emergency Sheltering System for an international audience of public and private disaster industry professionals on January 16 -18th, 2012, in New Orleans, La., at the International Disaster Conference & Expo (IDCE 2012).

Established in 2006, Colorado-based Versi-Panel Enclosures designs and manufactures innovative, reusable and collapsible containers and portable, modular buildings for a variety of industries. Founders Kevin and Ann Kvoles also own Companion Habitats, Inc., manufacturers of premier animal enclosures since 1986.

Versi-Panel Enclosures has created portable, collapsible shelters for people and animals in an Emergency/Disaster Situation. The BunkHouse has an optional add-on bathroom. The building is quick and easy to assemble, using no tools, and comes packaged in it's own storage shed. The AnimalSafe system provides a collapsible building for housing animals, along with collapsible animal habitats, and a mobile unit that can be easily towed by virtually any car in an emergency. All portions of either system are versatile, affordable, with quick and easy assembly. For more information about the shelters, please visit [www.vpenclosures.com](http://www.vpenclosures.com).

The International Disaster Conference and Exposition (IDCE2012), to be held January 17-19, 2012, at the New Orleans Ernest N. Morial Convention Center, will bring together emergency management, homeland security and disaster industry professionals from the public and private sectors around the world to share lessons learned and forward thinking regarding the policies, procedures and best practices shaping disaster preparation, response and recovery, loss mitigation, business continuity and more. Conference speakers, exhibitors and attendees will share the latest knowledge, technologies and techniques toward the common goal of minimizing the loss of life and property in future catastrophic events. Industry professionals can register to attend IDCE2012 through the IDCE website at [www.internationaldisasterconference.com](http://www.internationaldisasterconference.com).
